

David Riestenberg

David Riestenberg is a Project Manager and geologist with Advanced Resources International, Inc. He has over fifteen years of experience related to CO₂ storage, enhanced oil recovery (CO₂-EOR), and unconventional hydrocarbon recovery. Mr. Riestenberg currently manages the field and geologic characterization efforts for the U.S. Department of Energy's CarbonSAFE demonstration in Kemper County, Mississippi. And served in a similar capacity for a 2010-2018 U.S. DOE integrated CO₂ capture, transportation and storage demonstration in Mobile County, Alabama.

Previously, Mr. Riestenberg led geologic operations for an Appalachian E&P operator's drilling program including planning, logging and geo-steering supervision for over 150 horizontal gas shale and oil wells. Mr. Riestenberg is currently the program chair for Society of Petroleum Engineer's Carbon Dioxide Capture, Utilization and Storage Technical Section.
