

Ilya Chernyakhovskiy

Ilya Chernyakhovskiy is the lead and co-author for the [Greening the Grid](#) platform. He leads grid integration and storage analysis and capacity building efforts for NREL's international programs under the USAID-NREL partnership. Ilya is also part of the core modeling team for NREL's grid integration studies in India, including the landmark assessment of India's target to reach 175GW of renewable energy by 2022. Prior to joining NREL, Ilya was a research analyst at the Higher School of Economics in Moscow. He holds a M.Sc. in Resource Economics and Econometrics from the University of Massachusetts Amherst.
