

Christophe Metais is Project Director at TechnipFMC.

Christophe has developed over the past 25 years a strong experience in Project Management of Offshore Projects, especially with regard to Floating Production, Storage and Offloading Units and Floating LNG.

He started his career as engineer in hydrodynamics with Principia and moved to Saipem afterwards as Head of the Naval Architecture Department, and then as member of the Project Management Team of Offshore projects.

Christophe joined TechnipFMC as Project Manager in 2010. He was appointed Site Manager and then Deputy

Project Director of Prelude FLNG Project during the construction phase in South Korea. After the sail-away, he took charge of the Offshore campaign and appointed Project Director of Prelude FLNG until end of 2018 and first Gas-in. He holds a master degree in Engineering from the Ecole Centrale of Nantes, France.

Christophe is currently Project Director for the Tortue FPSO Project at TechnipFMC.
