

Hebab Quazi

Hebab Quazi received his PhD degree in Chemical Engineering in England. He provides leadership in developing and implementing strategic/sustainable solutions for oil/gas, chemical/ petrochemical, and conventional/renewable energy industries in the US and internationally. He directed programs funded by the US City, State and Federal Agencies, and by United Nations, World Bank, and Asian Development Bank.

His work involved research, development, testing and commercialization of technologies in energy (conventional and renewables), chemicals, petrochemicals, and environmental-mitigation. He is finishing a book on “Commercializing Nanotechnologies – from Laboratory to Market”. Also, he is a Book Series Editor on “Commercializing Emerging Technologies” for an international publisher. He is active with the US DoE / UCLA “Clean Energy Smart Manufacturing Institute”.
