

Kyle K. Wetzel

Dr. Kyle K. Wetzel, ASME Fellow, is VP of Blade Services at SkySpecs, Inc., based in Ann Arbor, Michigan, which he joined in July after 18 years operating his own engineering consulting companies. Dr. Wetzel is an internationally recognized expert on wind turbines and rotor blades. He has engineered state-of-the-art wind energy systems since 1993 in a variety of capacities, including early in his career a stint as Technical Manager of New Product Development at Enron Wind. Since then, he has provided consulting services to more than 100 clients on four continents, and more than 40,000 blades are operating worldwide to which he contributed to the engineering. Dr. Wetzel is a Technical Expert to the International Electrotechnical Commission (IEC) including TC88 and IECRE and is a voting member of two standards-writing committees.
