

## Biography

**Chris Robinson** is the Senior Manager for Additive Manufacturing Software Development within ANSYS, Inc. He started his career of AM research when designing satellite components in 2004. He has been in an AM research environment for 15 years at Sandia National Laboratories, Utah State University, NAVAIR, Boeing, 3DSIM and ANSYS. Chris has led many projects ranging from TRL 1 to production readiness

for commercial application (TRL 9). He has worked on material, process, and application development efforts utilizing, metal, polymer, and direct-write processes. Chris leverages his DfAM, R&D, product development, and global application engineering experience, along with a strong network of Additive Industry users to guide software development in a way that gives users solutions to address the problems they are currently facing when developing Additively Manufactured products.
