Message from the Conference Chair

The ASME International Gas Turbine Institute presents its 6th ASME Gas Turbine India Conference on December 5 – 6 at the Indian Institute of Technology Madras in Chennai. This 2-day event will bring together professionals, academia, and practitioners in the turbomachinery industry covering different application areas such as aviation, energy, and many more. I welcome the authors and panel speakers to present their papers and ideas which can spur more innovation to help define the future of turbomachinery in the region and globally. Our conference host, IIT Madras, is one of the premier engineering institutions in the country and boasts in research & development in the turbomachinery space. You can also look forward to interacting with many of the researchers at the 2-day conference.

Gas turbine technologies play a critical role across different industries and the need for continued research in those areas is unabated. In the aviation space, the need for improving fuel burn, reducing weight, and at the same time providing better reliability and time on wing is important. Academia, research labs and OEM's are continuing to push the boundaries of research to improve the state of the art in the industry. Similarly, in the case of energy industry, the transition towards renewable energy is happening at a rapid pace across the globe, however, this transition to green energy has its own challenges in terms of maintaining reliable and affordable on-demand electricity for the end consumers. This is where gas power based on turbomachinery technology is going to be play the complementary role of providing reliable and on-demand power for balancing renewables. Additionally, with significant shift happening in the O&G industry towards LNG development the access to gas is going to be even better in the coming years to help in the energy transition.

We sincerely thank all the organizations who have supported us over the years through generous sponsorships, all the authors, and speakers who have taken time to present their papers and perspectives to the turbomachinery community at large in the region. We appreciate the dedicated efforts of all the turbomachinery professionals across academia & industry who have provided their support as review chairs, vanguard chairs and session organizers. I would like to sincerely thank the conference core team members – Prof. Joseph Mathew from IISc, Prof. A.M. Pradeep of IIT Bombay, and Mr. Shraman Goswami from Honeywell Engines & Power Systems. I would also like to express my gratitude to the ASME staff for their dedicated support and guidance in making this conference a reality.

On behalf of the entire team, I would like to welcome you all to the conference to learn and to share about the latest technologies, best practices in the turbomachinery domain, and use this opportunity to network with researchers, industry professionals, and practitioners who play a role in the technology transformation happening in your respective areas.

Best Wishes!
