

Antonio Scalzi is a 2022 Oakland University graduate, with a B.S.E. in Mechanical Engineering, Specialization in Energy. He was also awarded Thesis with Distinction as a Presidential Scholar of the Honors College of Oakland University, for his research on combustion engine testing technology and strategies.

Antonio now works as a mechanical design release engineer on several hybrid and electric vehicle platforms at LG Energy Solution and looks forward to continuing his development as an engineer through working in the automotive industry, and continuing education.
