

## UNDERGRADUATE ENGINEERING STUDENTS CALL FOR PRESENTATIONS

Internal Combustion Engine Division ASME  
Invites Presentations for the  
**2020 Fall Technical Conference**  
November 1-4, 2020 • Denver, CO USA

The Student Presentation Chair of the ASME Internal Combustion Engine Division invites you to submit your undergraduate research in internal combustion engines. The **top two** entries will be selected to be present at the 2020 ASME Internal Combustion Engine Fall Technical Conference in Denver, CO. The winning students will receive free conference registration along with paid travel and lodging expenses for the conference up to \$1,500 for the two winning applicants.

Consider applying if you:

- Work (or have worked) in a laboratory that does internal combustion engine research
- work on the engine of a collegiate race team or your own car
- have innovative ideas for next generation advanced engines or alternative fuels
- are an internal combustion engine enthusiast and would like to deliver a presentation on the subject

The winning two students will deliver their presentations to a group of leading experts in the internal combustion engine field at the ASME Internal Combustion Engine Fall Technical Conference. This welcoming environment is a great opportunity for students currently involved in research that are considering pursuing a career or graduate school in the Internal Combustion Engine field. Many of the past winners have made connections during the conference lead to recruitment for career and graduate school opportunities. For senior undergraduate students, who may have already accepted a full-time position or begun graduate school by the time the conference is held, it is also a great way to be introduced directly to a large portion of the engine research community that you may be a part of for many years to come.

Additionally, as a conference attendee, you'll get to attend other researcher's presentations and network with people working in this exciting and important field. Applicants not selected as winners will be invited to present their work at a student poster session to be held during the conference (their student registration fee will be waived).

To be considered, submit; **(1)** an abstract/summary of your work in pdf format (2-pages max), **(2)** 10-minute draft presentation slides as a pdf file, and **(3)** a one-page mentor/advisor letter of recommendation to the Student Presentation Chair by **July 30, 2020**. The letter of recommendation must be from a professor or mentor working most closely with the student and must clearly identify the student's role in the work. A selection committee will choose the top two presentations according to an established review process. In that process, submissions will be scored according to the following metrics: (a) technical strength, (b) research novelty (c) quality of project execution, (d) degree of independent work, and (e) presentation quality.

You must be an ASME student member (with active membership) and have be an undergraduate student on the date of submission to be selected (if you graduated in or around May 2020, you are still eligible). Presentations material must all be original and cannot be contained in a technical paper submitted to the 2020 ASME ICEF conference.

### **Deadline Extended!**

**Send your abstract, draft presentation, and letter of recommendation by July 30<sup>th</sup> to:**

Dr. Scott Curran  
Student Presentation Chair  
Email: [curransj@ornl.gov](mailto:curransj@ornl.gov)
