

THE BROADENING PARTICIPATION
(B PART) COMMITTEE OF THE DESIGN
ENGINEERING DIVISION (DED) PRESENTS

The BPart Fellowship & Mentorship Program

This program is designed to uplift early career graduate students who are members of underrepresented groups within the DED (e.g., women, black and Latinx individuals, transgender individuals, and people with disabilities). The goal of this fellowship program is to create support systems (mentorship and financial) that enable graduate students who are not part of the dominant group in engineering to find in-roads and connections with the design engineering research community.

FELLOWS IN THIS PROGRAM WILL:

- ★ Receive a travel scholarship (**\$2000**) to attend the 2024 International Design Engineering Technical Conferences (IDETC).
- ★ Present a research proposal at a poster session for early-career graduate students and receive feedback from the research community.
- ★ Be guests of honors at an exclusive reception for BPart fellows to form community and to connect with senior researchers and mentors.
- ★ Participate in on-going mentorship activities with mentors from the DED community throughout the academic year to help navigate academia and grow their careers.

INTERESTED?

Prospective fellows should submit their CV and describe their research goals, motivation for applying for the fellowship, and continued engagement goals to the committee for consideration by **June 7th, 2024** at:
