

IOWTC 2025

International Offshore Wind Technical Conference

Toulon University, France

October 27 - 29, 2025

1st time in France

event.asme.org/IOWTC

IOWTC is a technical conference on offshore wind energy that will draw together members of the scientific community, researchers, academia and the offshore wind engineering industry from around the world. The conference provides a platform to exchange cutting-edge research, innovative technologies, and practical solutions to advance offshore wind energy. IOWTC aims to drive progress and foster global partnerships in the offshore wind sector.

About our Organizers

ASME (American Society of Mechanical Engineers) is a not-for-profit membership organization that enables collaboration, knowledge sharing, career enrichment, and skills development across all engineering disciplines, toward a goal of helping the global engineering community develop solutions to benefit lives and livelihoods.

EVOLEN is The French trade association serving energy industry companies and professionals. EVOLEN federates an ecosystem of 300 companies, research centers, training organizations, institutions and experts who energize the energy industry in France and abroad.

Why Sponsoring?

01

Promote your products, technologies, research, and advancements

02

Form connections, and network with potential clients, partners, and future talents

03

Reinforce the Offshore Wind Supply Chain

120 SPEAKERS

Confirmed attendees include leaders from major companies, academics from leading universities, and government representatives. They are involved in all aspects of offshore wind, from the development of new technologies to improving efficiency and reducing environmental impact.

About our Partners

Pôle Mer Méditerranée : Pôle Mer Méditerranée is a French competitiveness cluster that drives innovation and collaboration in the maritime and coastal economy, with a strong focus on advancing offshore wind energy and marine renewable technologies in the Mediterranean region.

France Energies Marines : France Energies Marines is a French Institute for Energy Transition dedicated to advancing marine renewable energies, particularly offshore wind, through research, innovation, and collaboration among industry, academia, and public stakeholders.

France Renouvelables: France Renouvelables is the leading association representing the renewable electricity sector in France. It brings together key players from wind, solar, hydro, and other clean energy industries—championing innovation, policy, and sustainable growth, including in the rapidly advancing offshore wind sector.

WEAMEC : WEAMEC (West Atlantic Marine Energy Community) is a leading French network based in the Pays de la Loire region, uniting academic and industrial stakeholders to advance marine renewable energy through research, innovation, and training. Its initiatives encompass various technologies, including offshore wind, tidal, wave, and ocean thermal energy.
