ABSTRACT

Include a 200-word abstract that concisely and clearly captures the main points of your Extended Abstract. This needs to concentrate on your approach and findings. Do NOT include anything related to the topic's background. Reserve that for Introduction. Here and in the rest of the document, use Times New Roman, 12 Pitch, plain text. You are free to use 11 Pitch if needed. Line spacing: 1.15. The text should be justified. Your abstract (this section) will be included in the conference program for the attendees to determine the most relevant presentations to attend.

Keywords: Place any keywords here

NOMENCLATURE

Place nomenclature section, if needed, here. Nomenclature should be given in a column, like this:

α alpha
 β beta

INTRODUCTION

Include a background on your study, including where the greatest needs are and justification for the study, i.e., what has been done in the past and how your study fills the gap in what's needed. The text should be justified.

SECTION 1

This section and the ones that follow will be titled according to the particulars of your study. Choose titles that are descriptive and informative. Be generous with your use of graphics to get the details of your study across. Remember that you have only 2 – 3 pages and one picture is worth a thousand words! Make sure that you provide a thorough description of each graphics (photos, plots, tables, etc.) that you include. All figures, graphs, tables, etc. should be numbered. Ensure that all text is in black and that there is no highlighted text.

FIGURE 1: PERCENTAGE OF PAPERS THAT SHOULD BE FORMATTED CORRECTLY

Equations should be numbered (1), (2), (3), and so on, with the number flush right in the column and a space before and after the equation, like this:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (1)$$

SECTION 2

Text for the second section is placed here.

CONCLUSION

Include a thorough analysis of your results and findings based on what you have already included.
