

ASME[®] 2021
POWER
Conference

CONFERENCE
July 20–22, 2021

Online, Virtual

**ASME's Power Division invites you to present your work at the
POWER 2021 virtual event!**
Serving the Power industry for over 100 years!

ASME's Power Conference focuses on the power industry's latest research, technical advances, development trends, and business strategies. Members of industry, national laboratories, and academia join forces to present and discuss fresh developments and new advancements on the power industry's most pressing topics. Topics, including power plant operations, maintenance, and performance, economics, regulatory compliance, and construction, are presented by a diverse group of power professionals

WHY SUBMIT?

The conference features a combination of keynote and expert panel plenaries, technical paper sessions, discussion groups, industry technical committee meetings, and workshops that bring a breadth of important and relevant knowledge together. The conference provides a forum for you to communicate with engineers, students, and professionals from around the world.

Topics:

- Fuels/Combustion
- Heat Exchanger Technologies

- Combustion Turbines and Combined Cycle
- Boilers / HRSG
- Advanced Tools for Cyber-physical systems and Digital Twins
- Risk Management, Cyber Security and Safety
- Plant Construction, Supply Chain Management, and Economics
- Renewable Energy Systems
- Steam Turbines, Generators, and Auxiliaries
- Plant Performance & Operations
- Robotics & Drones
- Experimental and Computational Fluid Dynamics, Thermal Hydraulics, and Data Analytics
- Water Management for Power Systems and Environmental Issues
- Student Entries

For more information, [visit here](#).

For technical publication submissions, authors should submit a 400-word text-only abstract by November 23, 2020. For presentation only submissions, authors should submit their abstract by March 8, 2021.
