- TIMELY
- ACCESSIBLE
- HIGH IMPACT

The ***Journal of Mechanisms and Robotics*** publishes research contributions to the fundamental theory, algorithms, and applications for mechanisms, machine systems, and robotics.

SCOPE

- Fundamental Theory, Algorithms, Design, Manufacture, and Experimental Validation for Macro-, Micro- and Nano-scaled Mechanical Systems and Robots
- Theoretical and Applied Kinematics
- Mechanism Synthesis and Design
- Analysis and Design of Robot Manipulators, Mobile Robots, Hands and Legs, Soft Robotics, Compliant Mechanisms, Origami and Folded Robots, 3D Printed Robots, Exoskeletons, and Haptic Devices
- Novel Fabrication
- Actuation and Control Techniques for Mechanisms and Robotics
- Bio-inspired Approaches to Mechanism and Robot Design
- Mechanics and Design of Micro- and Nano-scale Devices
