Upload your extended abstract submission to https://sbc.secure-platform.com/a

Present your research or attend to:

- · Learn about new advances in research aimed at advancing health equity
- Network and connect with colleagues in academia, industry, or government
- Unlock new ideas with over 40 technical topics and educational workshops including:
- AI and machine learning used in biomechanics
- Women's health and biomechanics
- Biomechanics related to medical devices
- Enjoy the New Mexico mountains with family, friends, and colleagues

2025 Technical Tracks

- Biotransport
- Design, Dynamics & Rehabilitation
- Education
- Fluid Mechanics
- Solid Mechanics
- Tissue & Cellular Engineering

Technical keywords

Please select the track (Biotransport, Design/Dynamics/Rehabiliation, Education, Fluid Mechanics, Solid Mechanics, OR Tissue Cell Engineering) AND two subtopic area keywords associated with your abstract. The system will not apply keywords that are not in the database

First Author - Primary Author, Must be the Presenting Author for SPC Co-Author - Non-first Authors on the Paper Senior Author - Senior Author or PI

[object Object].[object Object].[object Object].[object Object].[object Object]

- 01: General (for reviewers only)
- 02: Student paper competition PhD (for reviewers only)
- O3: Student paper competition MS (for reviewers only)
- 04: Student paper competition BS (for reviewers only)
- 05: UG Design Competition (for reviewers only)

- Active learning

Student Competition Rules Confirmation (Required for PhD, MS, and BS student paper competition submissions)

The eligibility criteria and rules are as follows:

- 1. Eligible PhD-level students include those pursuing an MD, PhD, or an equivalent terminal degree.
- 2. Eligible students for the SPC include those pursuing a degree relevant to the competition level that they are applying for (BS, MS, or PhD). Students who have graduated in academic year 2024-25 with the corresponding degree are eligible to participate (i.e. those who graduate in Fall 2024, Spring 2025, and Summer 2025 are eligible, but not Summer 2024).
- 3. First place winners of BS, MS, and PhD-level competitions in previous SB3C meetings are not eligible to participate for the same competition level, i.e. a former PhD-level 1st place winner cannot enter the PhD-competition again at SBC2025.
- 4. The student must be listed as both the first and presenting author. As such, the abstract content must be composed by work primarily completed by the student. Shared first co-authorship is not acceptable.
- 5. At least one co-author, generally the student's research advisor, must be included in the author list. The advisor must also consent to the submission of the abstract for the competition and the student's participation in the competition.
- 6. Only one entry per student (as first and presenting author) will be considered for the SPC. The same work cannot be submitted for consideration in any other session at SBC 2025. It is possible for a student to be listed as a co-author on a separate submission. If they are listed on an additional submission as secondary author, both abstracts must be clearly distinct.
- 7. Only the student listed as the first and presenting author is eligible to present as the SPC finalist at the meeting. It is required that a submission to the SPC is in the spirit that, if accepted, the advisor, the research institution, and/or the student will make every effort to encourage and support the student's attendance at the conference
- 8. Important: PhD-level SPC are in-person podium presentations; whereas BS- and MS-level posters are in-person poster presentations. In the rare event where the SPC finalist is unable to participate, the finalist should contact the appropriate chair for their competition level (PhD, MS, or BS) as soon as possible.
- 9. The research project must have been conducted while the student was enrolled at the competition level (i.e. BS, MS, or PhDlevels). The content presented must include only work that was completed prior to graduation for the prescribed competition.
- 10. The work must be original (not previously published as a peer-review publication) prior to the submission deadline. A correspondence higher than 50% with a previously published paper will warrant disqualification (e.g. methods may be similar to
- previous work, but the results must be original and unpublished). 11. Students eligible to compete in the SPC at all levels are required to acknowledge all rules during the abstract submission process
- 12. Students eligible to compete in the BS and MS levels are required to complete an attestation (template linked below) confirming that: (a) the majority of the work was completed by the eligible student, who is also the first and presenting authors; (b) the eligible student conducted the work as a student at the corresponding competition level; and (c) that the eligible student will (during the SPC) answer questions about their work without assistance from others, including their advisor(s) or peers. Abstracts submitted without this attestation may be withdrawn from the competition. Attestations require PI confirmation. The attestation will be uploaded in the abstract submission website.
- 13. The abstract template must be strictly followed. Not complying with the abstract formatting guidelines may result in disqualification from the competition. For example, you cannot change font size, margins, or the starting location of the text on the first page.

I attest that I have read, understand and will comply with the SPC rules

Release Form

Authors retain copyrights for the related abstract document. However, ASME requires permission from ALL authors in order to:

· Include the extended abstract in the conference app that is available to registered conference attendees Make the extended abstract available online

ASME will only use the handout(s) for the purposes stated herein. Any request for any other use will be submitted to the tutorial author in advance in writing for approva

Note: Any graphics included in the Handout document should be owned/copyrighted by the tutorial author.

Clea

For BS and MS competition, please download and complete the <u>PI/Advisor attestation form</u> from our website, then upload to the submission portal.

Signed PI Attestation (required only for BS and MS competition)

- Please download the PI/Advisor attestation form from our website. Then, submit your signed form here.
- This form must be completed and submitted for all BS or MS-level Student Paper Competition abstracts.
- The form is not necessary for PhD-level or general abstracts
- Files should be in PDF and not larger than 10mb
