

Mike Trego
Senior Technical Manager, Advanced Design Group, Engines
Honeywell Aerospace

Mike Trego is currently Senior Technical Manager for Honeywell Engines' Advanced Design Group; providing leadership to integrated system definition and technology infusion for both new product introductions as well as product improvements and upgrades. He

supports both commercial and military customers across all of Honeywell's propulsion, power, and hybrid product lines. With 33 years at Honeywell, Mike has extensive engine development experience including the highly successful HTF7000 super-midsize business jet turbofan engine for which he was awarded the Honeywell Aerospace President's award in 2014.
