Haption designs, manufactures and sells hardware and software solutions based on force-feedback. Founded in 2001, the company partners with the most advanced leaders to provide professional force-feedback solutions for medical, robotic, nuclear and industrial applications. This year, Haption will demonstrate a teleoperation solution using the well-known haptic device Virtuouse 6D. <https://www.haption.com>

The Department of Mechanical Engineering at Virginia Tech serves undergraduate and graduate students, alumni, the Commonwealth of Virginia, and the nation through a variety of teaching, research, service, and scholarly activities. Dedicated to excellence in research and scholarship and to upholding the highest standards in the overall quality of our programs, we prepare engineers for successful careers in industry, government, and academia. We emphasize engineering principles, hands-on projects, open-ended problem solving, and the essential skills of teamwork, communication, and ethics, and integrate these into the education of each of our students. <http://www.me.vt.edu/>
