

# CALL FOR PAPERS

## ABSTRACTS DUE - NOVEMBER 18, 2024

OMAE® 2025

44th International Conference on Ocean,  
Offshore & Arctic Engineering®

June 22–27, 2025

Vancouver, British Columbia, Canada

## SUBMIT YOUR OCEAN, OFFSHORE & ARCTIC ENGINEERING RESEARCH

PRESENT ALONGSIDE RESEARCH AND INDUSTRY LEADERS AND ADVANCE YOUR CAREER

ASME is now accepting abstracts through November 18. This year's event will be hosted in Vancouver, B.C. Canada, June 22-27, 2025

For over four decades, the OMAE conference has been the premiere annual event to showcase leading edge innovations and technological achievements in offshore engineering. OMAE is where researchers present new advances in offshore and ship structures, reliable production methods, ocean engineering technology, and arctic sciences. And recently OMAE has expanded to highlight research on offshore wind and solar energy, digitalization in key offshore operations, incorporation of advanced analytical techniques, and successful implementation of new technologies in the field. This is a great opportunity to not only present your work among leaders in the field, but also to take steps to get it published as well.

See if your research falls under OMAE's wide variety of topics including:

- Structural Reliability
- Materials Technology
- Offshore Wind
- Carbon Capture and Storage
- Hydrogen Storage and Transport
- Climate Change Impacts
- Sustainable Solutions
- And more

Visit the conference website for more information on our special and honoring symposias:  
<https://event.asme.org/OMAE>

**ABSTRACT DEADLINE: NOVEMBER 18, 2024**

## Schedule for Paper Submission:

November 18, 2024	Abstract Submission Due Date
November 25, 2024	Notification of Abstract Acceptance
January 06, 2025	Submission of Full-Length Paper for Review & Electronic Copyright Process opens
January 27, 2025	Paper Review Complete
February 03, 2025	Paper Acceptance Notification
February 18, 2025	Submission of Revised Paper for Review (if required)
March 03, 2025	Author Notification of Acceptance of Revised Papers
March 20, 2025	Submission of Copyright Form
March 24, 2025	Final Paper Submission

---

## Outreach for Engineers

This is the seventeenth year of the Outreach for Engineers Forum. Highlights of the Forum will include presentations of the various technologies (e.g. from ocean /or offshore engineering, civil engineering, petroleum engineering, aerospace engineering, mechanical/structural engineering project management), types of job opportunities, possible career paths, and a team building activity.

*Selected students will receive a complimentary student level registration.*

**STUDENTS APPLY NOW**

---

## Short Course Feedback

OMAE 2025 will host a set of Short Courses presented by experts the weekend before the conference. We hope to offer a set of timely, continuing education courses and suggest you consider joining your colleagues for a great start to the OMAE program.

It is always helpful to hear from potential attendees about topics they might like to learn more about. Click the link below to a quick "check-the-box" survey of potential topics.

**PROVIDE FEEDBACK**

---

Not planning to present or attend this year? Share this opportunity with your colleagues or students by forwarding this flyer.

If you have any questions on the OMAE abstract process, please email [congresshelp@asme.org](mailto:congresshelp@asme.org)
