

2025 SPONSORSHIP OPPORTUNITIES

About QNDE

QNDE, as a field of endeavor, is a highly interdisciplinary process that involves the use of various techniques to characterize materials and to detect both manufacturing and service-related anomalies in materials and structures which are important to safety in essentially all industries. The Annual Review is a meeting in which both advances in fundamental knowledge and new engineering applications in several measurement technologies — ultrasonics, eddy currents, X-rays, thermosonics and thermography, among others — are reported and discussed. For more than four decades, the QNDE Conference has been identified as the world's leading research/engineering conference in this specialized engineering field.

Raise your company profile and be a part of this iconic conference and 52-years of QNDE history.

About ASME

ASME is a not-for-profit membership organization that enables collaboration, knowledge sharing, career enrichment, and skills development across all engineering disciplines, toward a goal of helping the global engineering community develop solutions to benefit lives and livelihoods. Founded in 1880 by a small group of leading industrialists, ASME has grown through the decades to include more than 140,000 members in 151 countries.

For more than 100 years, ASME has successfully enhanced performance and safety worldwide through its renowned codes and standards, conformity assessment programs, training courses, and journals.
